

What do EDAPs offer?

- Equipment specially designed for pediatric patients
- A staff of physicians and nurses who are trained in both pediatric emergency medicine and pediatric advanced life support
- A Medical Director who is responsible for assuring quality of care by reviewing pediatric patient medical records.
- The ED Nurse Manager/Director and Pediatric Liaison Nurse oversees the quality improvement program and ensures the EDAP meets established standards

Did you know?

- Pediatric patients who require emergency medical care are taken directly to an EDAP by paramedics through the 9-1-1 system.
- EDAPs were first established in 1985 and are unique to L.A. County.
- Before the formation of EDAPs, the appropriate pediatric equipment was not available in all emergency departments.
- EDAPs participate in a variety of research projects, including the pediatric airway study, which compared different methods of delivering oxygen to children during an emergency.
- The Emergency Medical Services Agency monitors EDAPs to ensure that L.A. County children receive the highest quality emergency care possible.
- The Pediatric Advisory Committee comprised of physicians and nurses with pediatric expertise advises the EMS Agency on pediatric related issues

KIDS IN HOT CARS

CALL 9-1-1

**IF YOU SEE A CHILD IN A
HOT CAR, DON'T HESITATE TO ACT.
GET HIM OR HER OUT IMMEDIATELY.**

Always Look Before You Lock

Always check the back seats of your vehicle before
your lock it and walk away.

Keep in Mind a Child's Sensitivity to Heat

In 10 minutes, a car's temperature can rise over
20 degrees.

Even at an outside temperature of 60 degrees, the
temperature inside your car can reach 110 degrees.
A child dies when his/her body temperature reaches
107 degrees.

EDAP

EDAP

What is an Emergency Department Approved for Pediatrics (EDAP)?

EDAPs are hospitals that voluntarily meet specific standards established for the care of children aged 14 years and under. The hospitals have pediatric-sized equipment and specially trained staff to address children's unique medical needs. Currently, there are 40 hospitals in the EDAP system, including one hospital in Orange County and one in Ventura County.

Why are EDAPs important?

The needs of children are different from those of adults. Children have a different spectrum of disease, and their smaller bodies require specialized medical procedures and equipment that take into account their size and stage of development. In addition, when children are sick or in pain, they may not express their concerns the same way an adult would. Pediatric advocates feel that children in need of medical care do better when taken care of by physicians and nurses who are trained to attend to both a child's physical and emotional needs.

Los Angeles County Emergency Departments Approved For Pediatrics (EDAP)

1. Antelope Valley Hospital
2. Beverly Hospital
